DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 25, 2009 has been entered.

2. Claims 13-18 are currently pending in the instant application.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 13-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims recite the limitation “mineral or organic particles having surface properties that give particles low affinity for the liquid phase.” The term “low affinity” is a relative term, which renders the claim indefinite. The term is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree of “affinity”, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Furthermore, the particular surface properties possessed by the mineral or organic particles are not defined and are also unclear for this reason. Examiner cannot ascertain the metes and bounds of this limitation of the instantly claimed compositions.

Conclusion

4. No claims are allowed.
